# Mines and Prospects--Furnaces and Mills

## **NEW PROCESS FOR** CONTINENTAL ALTA

Management Procures Use of an Adult Mill With Which to Verify Results in Laboratory.

While the management of the Continental-Alta has not, in its experiments upon ores from that property, arrived at results so conclusive that it is remiy to proceed with the installation of a method with which to recover the The Market Generally Dull and motals from ores of the value of about \$2,000,000, it has, at least, progressed to a point where verification on a practical scale shall begin. In the laboratory in this city a 340 concentrate is being derived from the mineral contained in the rock and that this is possible along practical lines Manager Crowther is practical lines Manager Crowliner is how ready to demonstrate. To that end he has procured the use of an adult and up-to-date mill, and to it will begin the forwarding of ores from the Con-linental at once. The results obtained at the laboratory verified at this plant, recommendations will at once by forrecommendations will at once be for recommendations will at once be for-warded to the official family, and, with its approval, the construction of a con-centrator will begin, to be rushed to carriest possible completion. Meanwhile the usual tonnage of first-class ore continues to come to market with conditions throughout most

tion of Continental ores will be com-pleted and in commission next season the local management entertains no doubt whatever as the means with, which to construct it have been already provided, while ample water is acquired provided, while ample water is acquired in rights which the management sequred some time ago from the State. The harnessing up of the latter will have begun in a short time that the management may get power with which to prosecute a campaign of unpresedented activity throughout the aproaching winter up there. It is now too late, perhaps, to speculate on the operation of the trainway between the camp and the valley smelters,

### COPPER COMPANY OFFICIALS.

#### Will Inquire Into Conditions at Bingham Mines and Mill.

To fathom the streams of copper, gold and silver-bearing concentrates now gushing from the Utah Copper company's mill in Bingham canyon, Charles A. MacNelll and Spencer Penrose, president and treasurer respectively of the proposition, came in from Colorado yesterday afternoon, and, in company with Manager Jackling and Vice-President Wall, will depart for plant and properties within the next few hours. With reports forwarded them from each, the visiting officials are very wuch pleased, the integrity with which the mill, indeed, and the average being maintained by the ores, a source of most gratifying astoriishment to them. Discussing conditions at Cripple Creek

Discussing conditions at Cripple Creek the visitors said that, notwithstanding spasmodic interruptions, they were rapidly recovering the normal, with the output at this time averaging about 1000 tons delly, while this will be exceeded in a short time. A large percentage of this output is going to the mills and furnaces of the United States Reduction and Refining company, of which Mr. MacNeill is the general manager, and while the production of this aging about \$1,500,000 monthly, it is do-ing so while the Golden Cycle, Inde-pendence Con, and some others are tied up in litigation, with Stratton's Independence, at which the lease system has been introduced, just getting back

While citizens of the district are getting rid of elements that have made themselves detrimental to good order and miners who desire to work, said Mr. Penrose, the echoes of war are becoming gradually fainter and the production of the remainder of the very duction of the remainder of the year will show a most pronounced increase The visitors who recognize a source of almost exhaustless wealth on the properties of the Utah Copper company will remain in the State several days.

## CON. MERCUR OUTPUT.

#### Shareholders Considerably Relieved by the Earnings for July.

Local interests in Con. Mercur are deriving not a little comfort from the earnings of that proposition in July, made public, it is said of them that they

and while the proceeds have not been have added not a little to the sur-plus. Meantline the record in August is plus. Meantime the record in August is maintaining a battery, which promises an even better exhibit for the month, while it is ead of the infine that at no time has so small a force been required to supply the needs of the mill. While to supply the Becca of the mill. While the market valuation of the company's domains and mill has been reduced to about \$150,000, there are not many gold mines in the West that are at this time distancing the output of Con. Mercur, while there is always the possibility of a new bonanza on the next shift.

## DEWEY MILL'S FUTURE.

#### Local Customers to Have the Use of It for Some Time Yet.

Until such time as the town trustees at Bingham shall have arranged for a more economical distribution of the waters of Bingham canyon, sald Col. E. A. Wall, by whom the Dewey mill was recently purchased, the Ben Butler and other customers will continue to have access to its tables. After that it will be made to meet the requirements of ores not in dispute on Kempton ground. and from which a most profitable product will be derived. This will be gratifying to not a few who have been benefited by the plant, the consign-ments to be put through under the di-rection of Fred Bemis.

#### DAY ON CHANGE.

## Orders Easily Gratified.

The day on the mining exchange reappear in the dividend column hext month. Daly-Judge was in good demand at \$4.50, with \$1.40 rejected by Mammoth, while Daly held out obdurately for \$2.50 and Boston Con. for \$7. Uncle Sam, which is coming forward with a dividend, was shorted down to 21 cents with Tetro coming out to a bid of 22 while a small lot of Swansea was gobbled up at 40 cents. While Yaukee Con. was not so buoyant as at the previous call it was in good dethe previous call it was in good de-mand around 5 cents, while Petro, on the retired list for so long a time, found cutsomers around 6½, with Carlsa stationary at 8 cents, the day closing on the following market:

## Boston Market Quiet.

Boston Market Quiet,
Special to The Tribung.

1008TON Mans. Aug 23.—When there
is trading in the Boston market prices are
strong, and when trading is quiet prices
hold their own. This is gradually putting
the market on a much better level, There
is certainly no pressure to sell stocks and
any little buying demand brings about
higher prices. This forenoon the market
was active and strong, while the afternoon witnessed a quiet market with a
few changes. Hornblower & Weeks,
brokers, 53 State street, Boston, and lo
Wall street, New York, furnish the following quotations.

## THE TRIBUNE NEWS STANDS. SEASON'S ACTIVITIES AT HAILEY, IDAHO

Singular Development in the Crocsus-Salt Lakers' Operations at Red Elephant Being Rewarded.

The systematic researches that have characterized the season's activity at Hailey, Ida., have been productive of most gratifying results, said Judge Litfleton Price, who was among the day's visitors from those diggings, the more interesting of them at this time, perhaps, a recent disclosure in the Croesus, which partakes not a little of closed on the sale of 8000 shares of the nature of a frenk. It was at a depth for \$3652.62 and with the market painfully lethargic. Daily West did some business, but at reduced prices, the shorts guaranteed a delivery of 150 the shorts guaranteed up a distinct and entirely new one, and while the latter appear at that \$1.67 was required position within presents an ultra change. In the discovery ledge, said Judge Price, the filling consists of an up to \$1.50 on a report that it would tempear in the dividend column next month. Daily-Judge was in good poolerates, overwhelmingty, although gold, while if the new lead pro-ponderates, overwhelmingly, although occurring in the mass of milling ore are bunches of high-grade copper. The contrast is so pronounced as to afford a most interesting lesson, and the student is watching every shot

At the Minnie Moore the management continues its output of ore of excellent quality, with great volume of wealth pouring into the pockets of its owners, while in the Hed Elephant, operated by Salt Lake talent, ore of good quality is exposed in two places, without reference to that which awaits profitable reduction at the mill. At the Tiptop, con-trolled by John Q. Packard of this city the opening of lower levels continues with apparently satisfactory results, and preliminary to active and profitable

production.

With conditions at the great lead mines of the Coeur d'Alene region, the Judge, who recently visited them, was very much pleased. Not only have the resources of that remarkable lead camp maintained their strength as the ledges have been fathomed, but their quality, Especially is this true of the Tiger and Standard mines, and more especially of Standard mines, and more especially of the Bunker Hill,

Judge Price, who is the guest of Laurence Greene at present, is on his way to Tonopah, where he will conduct an examination of properties that have been commended to him and his asset

### TO BEGIN WORK.

#### Development to Be Rushed by Capt. De La Mar on New Purchase.

According to reports from Nevada, M. J. Heller, representing Capt. De La Mar, is preparing for extensive development work at the Bluestone mine at Yerrington. C. S. Week has been appointed superintendent and J. W. Logan foreman. Tracks are being laid in the mine, the hoist will be reinstalled and when these preparations are complete from 20 to 30 miners will be put to work. According to Hartwig A. Cohen, the mine presents one of the biggest conner possibilities ever opened up in copper possibilities ever opened up in the West.

## TO PAY ITS DIVIDEND.

#### A Friendly Tip to Resident Interests in the Grand Central.

Local shareholders in the Grand Central of Tintic claim to have received assurance from official sources that the company will resume its position among the dividend-payers in September. At pectedly reduced a short time ago are being reorganized, the output of ore of fine quality is being increased and there is no reason apparent to competent mining men why the carnings should not be considerably in excess of a \$25,000 dividend each month.

## Gold Strike at Ossceola.

Special to The Tribune.

OSCEOLA, Nev Aug. 27—Alex Justessen, a mining man from Utah, located a property in the Osceola Mining district on a gold-hearing ledge some time ago. He started in on the hanging wall with a tunnel, running seventy-two feety then making a crossout, following a seam of rich ore After driving a distance of four feet he struck a vein-four feet wide of gold ore, assaying, according to his report, \$45 per ton. Mr Justesen has found pieces of gold, some of which are worth as much as \$4 cents, in the rusty seams of his pay streak.

From the face of his drift, perpendicular, he is not down more than forty feet. There is a new mill going up within four miles of his irroperty. Mr Justesen expects in a few weeks to be shipping ore. Osceola for years has been a rich placer mining came, but from indications now the vein has been struck from which this placer gold originally came from. Special to The Tribune

#### ON GOLD MOUNTAIN

Mineralization of Camp and Ledges by Which It Is Traversed.

A staff correspondent of the Mining World, Chicago, who has been making a study of Gold Mountain, with the Annie Laurie as its particular star, writes his publication:

Taking the district as a whole, there is no other of like extent in Utah over which the outcroppings are so plainly traceable and over which, extending from above the Sevier mine, near Kimberly, to below the territory of the Gold Development company, is there such sin amount of float and porphyry exposed, much of mat and porphyry exposed, much of which carries very good values. Here and there are found large porphyry dyles, and from the surface float and formation are plainly indicated the vein courses across the bills, as an indication of values sometimes found in these surface showings. The Sevier Withing corporate showings are series. Mining company is shipping a car of rock from surface outcropping along the great dyke crossing its property, which dyke is traceable for a distance of 12 miles across the country to Mt. Baldy. This car of rock will have an average value in gold and silver of two dollars per ton. As to whether these veins as indicated will carry increased values with depth is many sactions of the diswith depth in many sections of the dis-trict is problematical, and with few ex-ceptions not enough development work has been done to determine this. As a general proposition, the values carried at or near the surface in the southern end of this great vein trend have been rather slight, while those found about

and above Kimberly have been strong er. The soft or porous character of much of the surface about the Marys-vale district would seem to indicate that the values lie at depth, as they could easily leach, To determine this will require money, as it is not a poor man's camp, and the general surface indications would surely seem to warrant the effort and the expenditure of

### STRUCK IT RICH IN BIG CAVE.

#### Old Water Course Covered With Black Sand Panning Fine Gold.

Special to The Tribune, CALIENTE, Nev., Aug. 21.—Hank Bul lard, who, in company with Jim Bur-roughs and M. F. Galloway located the lard, who in company with Jim Burroughs and M. F. Galloway located the "Southern Cross" free gold group between the upper Virgin and Moapa rivers last apring, met with a peculiar circimstance in sinking a shaft on the "Bully Boy" in April, They mank forty five feet on a ledge three feet wide of \$14 ors and put in four holes for an afternoon shot. On going down the ladders the following morning Bullard came near neeting death by stepping from the bottom of the last ladder, but clung to a lower round when his feet encountered no wall nor resting place, while the bottom ladder swayed to and tro, hanging from its fastenings above. Their last shots had broken through the crust of a cavern, the depth of which could only be guessed at by dropping recks, which on landing but taintly sounded. They obtained a long rope and secured it to the halder and Bullard, after dropping lighted brush below to accertain the quality of the air below, swung down into the cavern with candles to explore its depths.

The 59-foot rope did not reach the bottom and he was compelled to climb up hand over hand to the ladder. They attached 50 feet more and he again descended and found himself in a cavern nearly 100 feet long by 89 feet wide, 70 feet below their 45-foot workings. The cavern, but had completely disappeared, and the sides on the north and sould were granite, covered in places with water crystal.

ter erystal.

There was no outlet that they could find to the immense cave and the floor was covered with broken pieces of crystal and showed plainly an old water-course, from which they took a half sack of these three courses. course, from which they took a half sack of black sand, which on panning they

found carried fine gold.

They determined to go to bedrock in this water course and afteen feet downstruck hardpan and took out nearly \$200 worth of small nuggets. They then cleared off a portion of the bedrock and have taken out enough gold to not them about \$500 each. They now propose to drift north and south on the bedrock and raise the sand to the surface, and, although they have a haul of cight miles to water, believe it will prove a bonangato work.

Frank Willett and George Frazer, owners of the resently located "Stone Age" group of gold-copper claims twenty-three miles northeast of Moapa, passed through camp teday en roots to Salt Lake with samples of ore for assay Mr. Fraser is a son of Morris T. Fraser, a big cattle owner in New Mexico, and will be able to put in a mill if the assays warrant this expenditure. They claim to have four feet of panning ore and have run 75 feet on the ledge, taking out a large amount of ore, part of which is already sucked, and at the breast of the tunnel they have a depth of 55 feet from surface. They will be accompanied on their return by Herman Bruxton, a mining expert of Colorado Springs, who will examine the property and report results of investigation to Mr. Fraser, Sr.

George Fenelon and John Francis, who have been prospecting south of Overton on the lower Virgin river, passed through camp today with a sack of samples taken from their claims recently located. They have some fine specimens of free gold in white quartz. The locators say that all ore taken from the vein pans freely and believe they have ample encouragement for further development. They have located six claims and have completed the location work on all of their group.

Beri Maynard and Dick Franklin re-turned from Salt Lake yesterday and showed amays of 317.9 and \$28 per ton in gold ofe taken from their Samete-claim south of Los Vegas. They also have two locations of gold-copper south of Goode Springs on the line of the San Pedro road and say they have shipping ore as soon as the road is completed to that point, with but eight miles wagon haut. 4 6 4

There has been great activity in lo-cating claims all along the line of the San Pedro during the past five months. Already Sait Lake capital is largely in-prested along the San Pedro and sev-eral sales are on tap in the near future.

## THE MINERAL EXHIBIT.

#### Many Collections Promised the Real Estate Men's Association.

To the application of the Salt Lake Real Estate association for samples with which to create a mineral exhibit in the city the miner is responding freely, said Col. B. A. M. Froiseth, who has just completed a canvazs of Tintle's camps, and there is every assurance at this time that the minerals of every camp in the State will be represented in the display Tomorrow the Colonel will leave for Park City where he will sollent samples at the hands of the miners, and from this source he expects a most instructive collection. He desires to again impress upon the miner that the express on any cousignments made by him will be paid for by the association, and urges that they act promptly as the

## OUTSIDE PATRONAGE.

#### Heavy Orders for Mine Equipment Are Pouring In.

The best evidence of increased activ y and results that are being achieved I Idaho and Nevada, said Curtis F Mason, resident representative of Fair-banks, Morse & Co., yesterday, is the shower of orders for improved equip-ment that are daily coming from those sources. From nearly every camp of any prominence in those States requims for machinery are arriving, one of the more recent that of the Resurrec-tion of Mountain City, which will in-stall a hoist capable of raising from a depth of 500 feet or more. Certainly local supply houses are sharing the business with far-west competition as never before and with favorable tariffs it will continue.

New Company Incorporated.

The Nelson Mining company of Park City filed articles of incorporation with the Secretary of State yesterday. The capital stock, of \$15,000, is divided arto as many shares, valued at one offiler cash. The officers of the incorporation are: President, William M. Ferry, vice-president, William H. Nelson, secretary, it S. Townson's treasurer, W. W. Armstrons, These officers, with John C. Nelson, will constitute the board of directors, The company is the owner of the Spot Cash, Spot Cash No. 1, Spot Cash No. 2, Spot Cash No. 3, Big Bend and Crowtord United States patent, lot No. 37, lodge mining claims in Eikhorn Mining district, Wasatch county. New Company Incorporated.

#### Big Offer for Claims.

Special to The Tribune Special to The Tribune
PROVO, Aug. 22.—There is much talk
going on among persons interested in
mining properties in and about Soldier
Summit. During the past few weeks
there has been considerable prospecting
going on, with developments variously
reported. The past month there have
been a number of locations flied with the
Recorder from that quarter.

Men from Denver interested in certain
lithographic properties are offecing \$25,00
for a fifth interest in a claim near Soldier Summit. These men have been
looking over the situation for some time
and made the offer yesterday morning.

#### Railroad to Goldfield.

Several preliminary surveys of the route of this road have been made and that which will most probably be accepted will be up Mineral street out to the Indiana Tonopab, where it will swing off southeast along Raiston valley to Dismondfield and on to Goldfield, ays the Tonopah Bonanza.

### Mining Notes.

G. T. Ingersoil, a well-known mechanical engineer, has gone into Idaho in the interests of Fairbanks, Morse & Co.

The Yukon World of August 7 records a shipment out of Dawson of 1800 pounds of gold.

Chris Wagener is preparing to forward trial lot of copper, silver, and lead ore rom the group in Emigration canyon being developed by him and others.

Superintendent Dare of the Bullion mine t Stockton has gone to camp again after outering with Manager Greene.

Prof. R. A. F. Penrose of the Utah Cop-per company is still prosecuting als ob-servations in the mining camps of Aus-tralia. He will spend several days in this locality on his return from that country. Henry Harker, manager of the Gold Dust mines at Leesburg, Ida, has re-turned from camp, after trying out the new stamp mill with which they have been equipped and with results is much released.

States Mining company is at Boston, which city he will leave for Salt Lake the last of the week. Munager Frank A. Keith of the Tono-Mining company's properties in the Nevada camp, leaves for the west

gain today.

Rowe Frazier, who has been long idenilided with mining interests throughout
the Wast, leaves for his old home in Jeresy City on Saturday next, accompanied
by Mrs. Frazier, it will have been his
list visit to the scenes of his boshood in
seventicen years, and a large circle of
friends wish them a series of golden
holidays.

holidays.

The order for scales at the big Now-house mill has been pinced with Curtis P. Mason of Fairbanks, Morse & Co.

J. B. Turner, superintendent of the Yankee and Siar Con. of Tiotic, came in from camp again yesterday morning, quite well pleased with the behavior of each.

The Yampa smelter appeared on vester-day's market with sixty tons of copper, gold and silver-bearing matte.

The management of the Utah-Apex company's Thitle properties will the pres-ent week close its lot of 50 tons of ore that has been going to United States fur-naces.

Three more curloads of copper concentrates from the Utah Copper company's mill left the plant in Bingham canyon last night, with another sot piling up,

Superintendent Frank Swindler of Bam-berger's De Lamar mines is in California accompanied by Mrs. Swindler. Capt Duncan MacVichic, general man-ager of the Bingham Con, came in from the Eagle & Blue Bell of Tiptle last night much pleased with its behavior. The management of the Comstock mill at Park City is headed for market with a lot of concentrates from the recent run at the mill that promises most satisfactory results.
